WEEE Compliance Statement

v1.0.4 June 2011

Governments, customers and the public are increasingly interested in the proper disposal of used electronics. The European Union (EU) has developed the WEEE (Waste Electrical and Electronic Equipment) Directive to ensure that systems for collection, treatment and recycling of electronic waste will be in place throughout the European Union.

VSI will comply with the provisions of the WEEE Directive and any future national implemented legislation.

As a producer of electronic devices, VSI will provide for the financing of the treatment and recycling of waste returned through these designated collection points in accordance with local requirements.

VSI, will provide free recycling of all electronic equipment once a customer has returned the equipment to a VSI designated collection point and where a replacement product is being supplied by VSI. Where a replacement product is not being supplied, recycling services can be provided on request at additional cost. Where national legislation dictates that other services should be offered, we will adapt our service to be compliant.
